Moog Parts. Moog Specs. Moog Specialists.

Moog Authentic Repairs.

We know that our products are critical to your operations. Our RKP Pump is not just a part, it acts like the circulatory system for your machine. As the new owner of the RKP Pump product line, Moog brings a commitment to quality and timeliness of repairs. Moog is an experienced manufacturer and designer of products for the most precise industrial applications including RKP Pumps, hydraulic valves, servomotors and drive electronics, integrated hydraulic manifold systems and more.

The robust design and contamination-resistance of Moog's RKP Pump products mean that they are known for exceptionally long service life. When you need a repair, you can trust us to renew your original performance, while minimizing downtime. Moog's Repair Seal is your guarantee of a Moog Authentic Repair. Moog Parts. Moog Specs. Moog Specialists. No other repair service provider can offer you this confidence.

Moog Parts.

Moog produces a wide range of RKP Pumps in different sizes, and single and tandem configurations with a selection of compensators and mounting flanges. RKP pump components have critical dimensions and material requirements that ensure long service life and high volumetric efficiencies.

We evaluate the condition of your pump to determine what is needed to bring your product to "as new" performance. From bearings to slipper pads to compensators, you can be confident that when parts are needed, they will be original equipment parts from the manufacturer who knows how to build the product.

Moog Specs.

Sophisticated IT systems provide global access to drawings, performance parameters and specifications for all of our different models no matter when or where the original part was manufactured. All RKP pumps are repaired and tested to the latest specifications, including product enhancements made over time. Only Moog's repair facilities for RKP pumps have the current specifications needed to ensure accurate performance and reliability for continued long service life.

Moog Specialists.

As experienced designers and manufacturers of RKP Pumps, Moog's professionals understand the products and applications of our customers. We extensively train our repair technicians on RKP pump technology and provide detailed repair procedures to ensure consistency and quality. All repaired pumps are thoroughly tested to ensure they perform like new. Application and design engineers provide technical support for our repair activities to insure that the installation, operation, and maintenance of repaired products are smooth for users. Field service from experienced technicians is also available for customers that need convenient, on-site assistance. Our distribution network acts as your resource for technical assistance, training, and order processing for all repairs.

Minimize Downtime. Maximize Savings.

Moog knows that repairs can mean expensive downtime for your company. You can rely on Moog's RKP Pumps to run like new when you reinstall them on your machine. We back this promise with a full 2-year warranty. Unreliable repairs and re-installation can mean more downtime and costs you cannot afford on your critical operations. Why settle for "good enough" repairs when you can have the best? Rely on Moog Authentic Repairs.
