

**St. Lawrence**

The Myles Group Company

# St. Lawrence– Troy

## Servo Valve Repair Services

- **24 month “Same as New” warranty** assures you will get improved lifespan at a fraction of the cost of new
- **All servo valves are statically and Dynamically tested at the factory on Moog’s proprietary Automated Test Equipment** to assure that valves meet all performance specifications
- **Due to product liability, Moog has not sold repair parts since 1997**
- **Customers have easy access to St. Lawrence-Troy Application Engineering and Integration Staff** for expert advice
- **St. Lawrence-Troy services can provide you with a full Root Cause Analysis** of why your servo valve failed, enabling you to take corrective action and prolong servo valve life
- **During re-build Moog servo valves are always upgraded to current factory design levels.** *The 760 Series 50 mA valves are upgraded to a carbide ball!*
- **St. Lawrence-Troy tracks your repairs** to help you identify problem areas and reduce long term repair costs
- **Goal: Reduce your yearly overall repair costs** and use the funds to upgrade system.

Moog G761 with carbide ball
